Lahore, Pakistan
Portfolio : iammuaz.com

Principal Software Engineer with nearly 10 years of experience in game development, building real-time interactive systems, multiplayer platforms, and scalable backend services. Specialized in client-server architecture, networking systems, and cloud-integrated applications using Unity, C#, Node.js, and .NET.

Skills

Programming	C#, C++, TypeScript, JavaScript, Lua
Game Engines	Unity (Primary Engine), Unreal Engine (Working Knowledge)
Ecosystem	ECS, Addressables, Dependency Injection, Scriptable Objects, Editor Tooling, Profiler Mastery, Shader Graph, Optimization
Multiplayer	Photon (PUN/Fusion/Quantum), Mirror, Colyseus, Client-Server Architecture
Backend	Node.js, .NET, REST APIs, WebSockets, Microservices
Cloud	AWS, Docker, Scalable Backend Infrastructure
Architecture	Distributed Systems, Event-Driven Systems, Scalable System Design
Engineering	SOLID, OOP, Design Patterns, Clean Architecture
Tools	Git, JIRA, Agile/Scrum

Professional Experience

Present – Dec 2022 — **Technical Lead, Salvay, Remote (USA)**
- Led architecture of real-time multiplayer systems.
- Designed scalable gameplay and networking systems.
- Guided engineering teams in implementing performance-critical game systems and real-time features.
- Collaborated with cross-functional teams to translate product requirements into scalable game architectures.

Real-Time Systems | Architecture | Team Leadership | Product Delivery

May 2025 – Dec 2020 — **Principal Software Engineer, CLV Technologies, Lahore, Pakistan**
- Built scalable game systems using Unity and Unreal.
- Led proof-of-concept development to validate gameplay mechanics and system architecture feasibility.
- Built client-server architectures, multiplayer frameworks, and backend systems for interactive experiences.
- Contributed to game system design and cross-team technical planning.

Client-Server Systems | Multiplayer | Backend Integration | Technical Discovery

Dec 2020 – Dec 2019 — **Senior Game Developer, Gaminations, Lahore, Pakistan**
- Developed core gameplay systems and mobile games using Unity.
- Implemented performance optimizations and player-facing mechanics.
- Contributed to game design implementation and Agile development workflows.

Unity | Mobile Games | Optimization | Agile

Nov 2019 – Jan 2019 — **Senior Game Developer, United We REACH, Pakistan**
- Developed Unity-based educational games and interactive applications.
- Implemented gameplay systems, UI flows, and player interaction mechanics.
- Collaborated with cross-functional teams to deliver engaging game experiences.

Unity | Educational Apps | UI Systems | Team Collaboration

Dec 2018 – Jul 2017 — **Freelance Game Developer, Self-Employed, Remote**
- Built Unity-based mobile games and gameplay systems for clients.
- Delivered UI, optimization, and deployment.

Unity | Mobile Games

Jun 2017 – Dec 2016 — **Game Developer, Center for Game Design, University of Central Punjab**
- Developed game-based educational applications using gameplay-driven learning systems.
- Led a small team in building interactive game experiences.

Interactive Learning | Game Development | Team Leadership

Education

BS Computer Science — University of Central Punjab
